

NPP
Implementation Overview
June 2018-February 2019

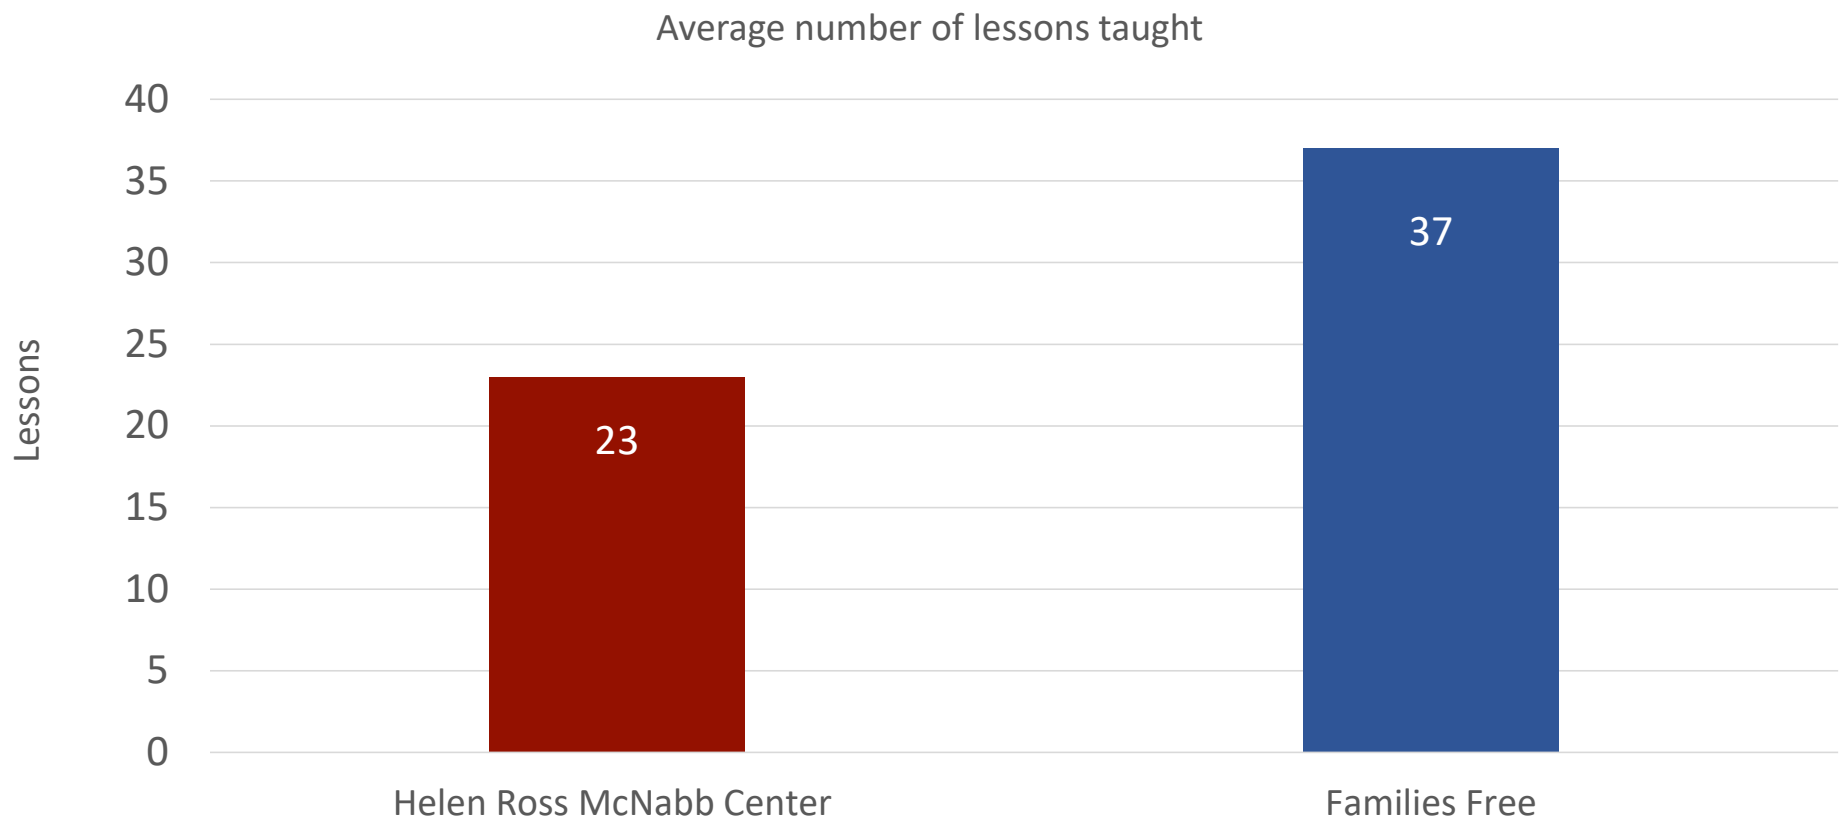

About the data

- This analysis is derived from information obtained through monthly reports from the private provider agencies currently implementing NPP: Helen Ross McNabb Center, Families Free, and Camelot.
- Monthly reports were collected from June 2018 through February 2019.
- Helen Ross McNabb Center and Families Free submitted monthly reports for the most comparable number of months (n=8).
- Since Camelot has been providing NPP to families for a shorter amount of time they are not included in this report. They will be included in upcoming analyses.

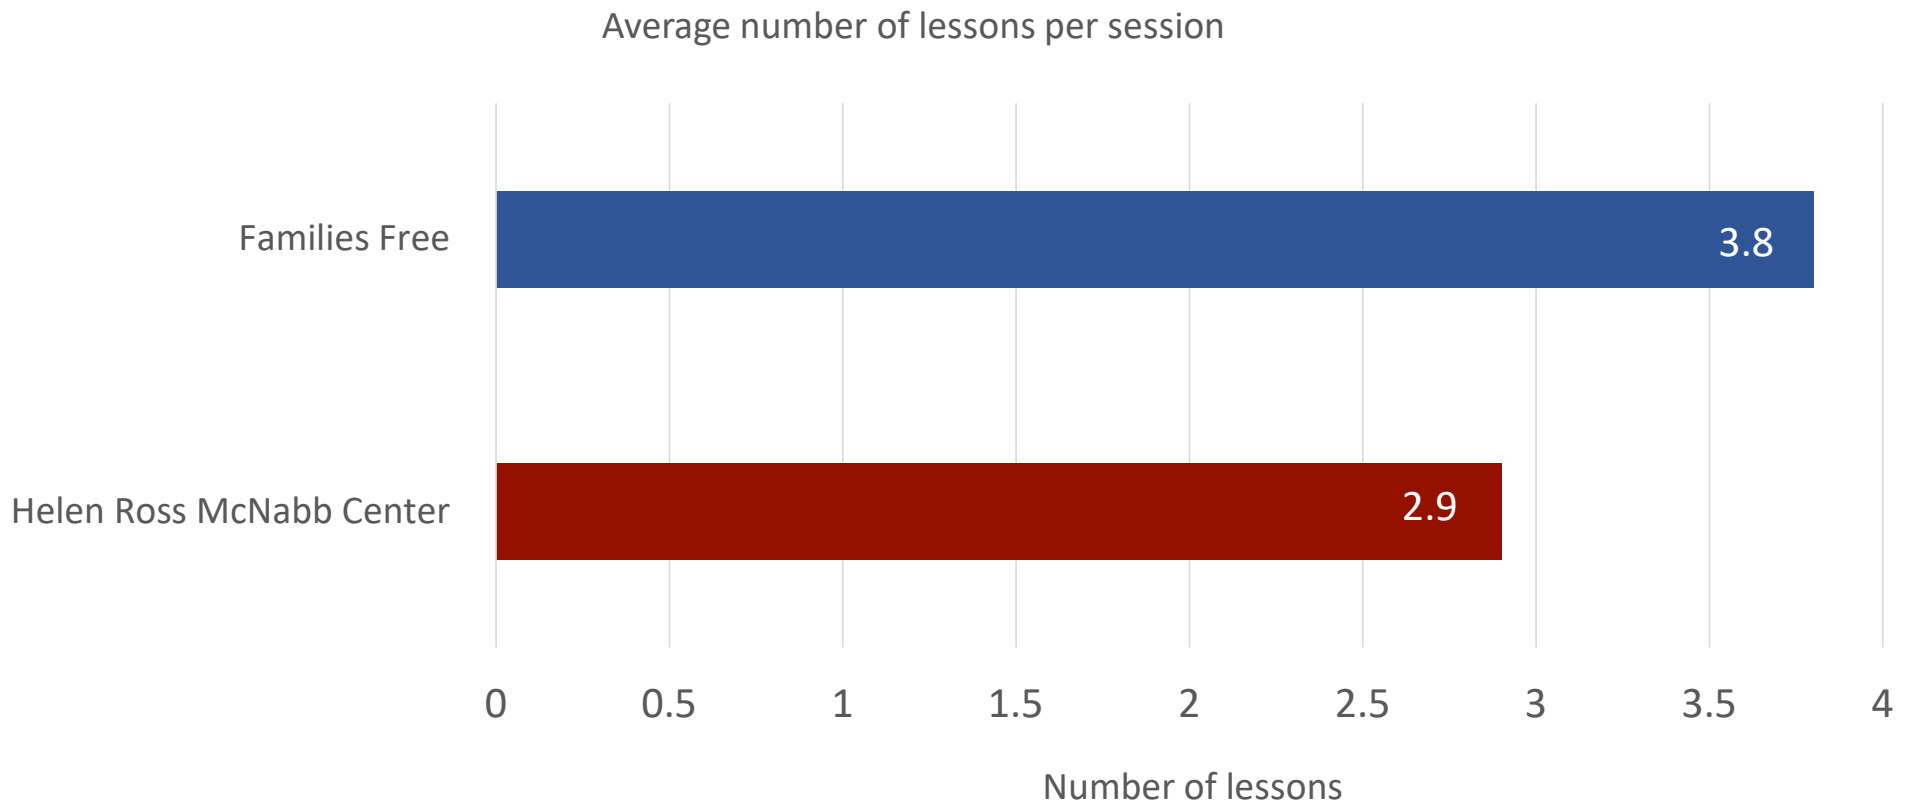

Families Free served fewer families but more individuals within those families, whereas Helen Ross McNabb Center served more families and fewer individuals.

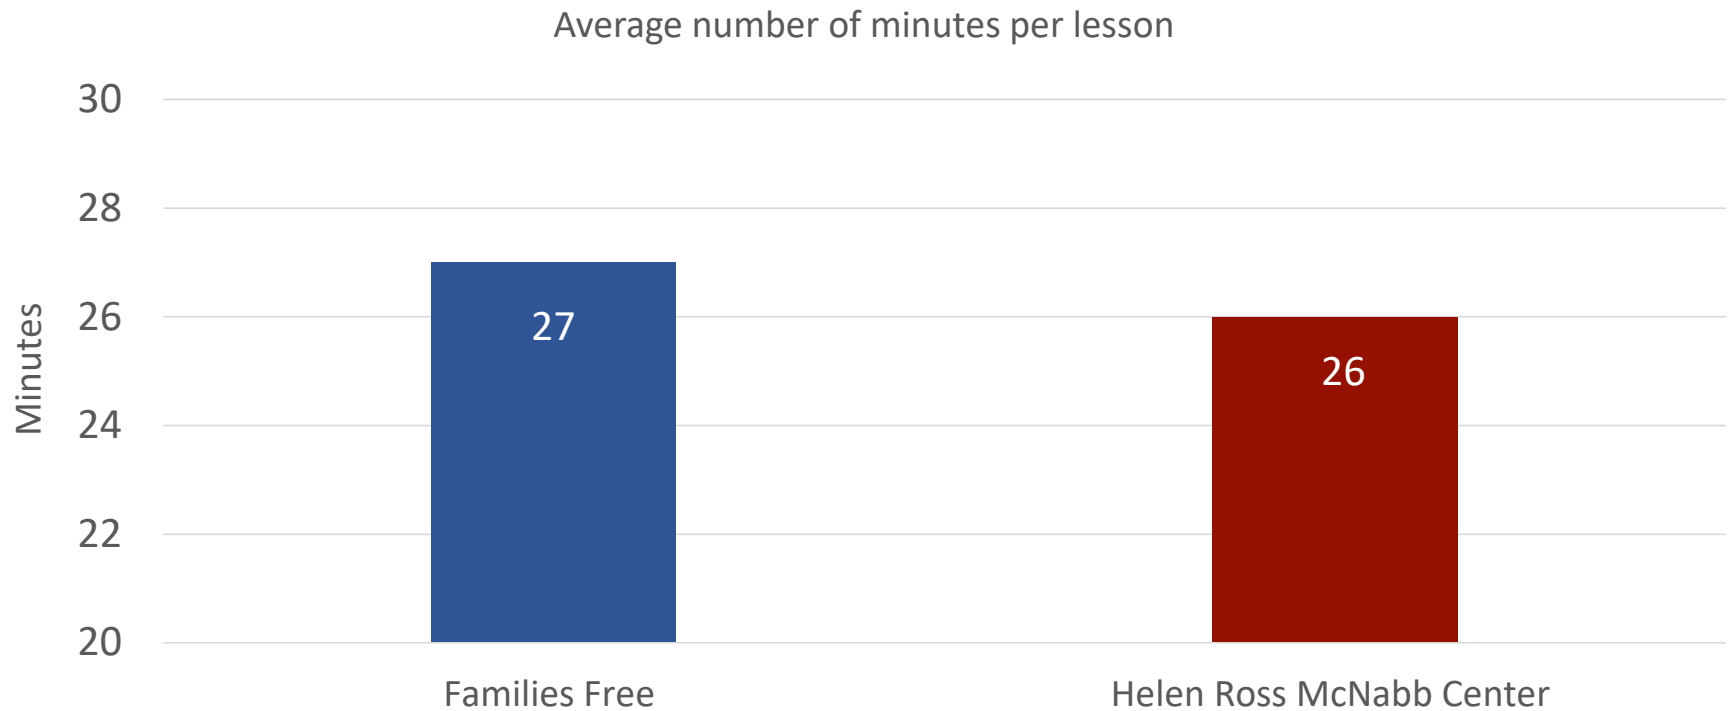

During the eight month reporting period, Families Free delivered an average of 37 lessons per family. Helen Ross McNabb Center delivered an average of 22 lessons per family.

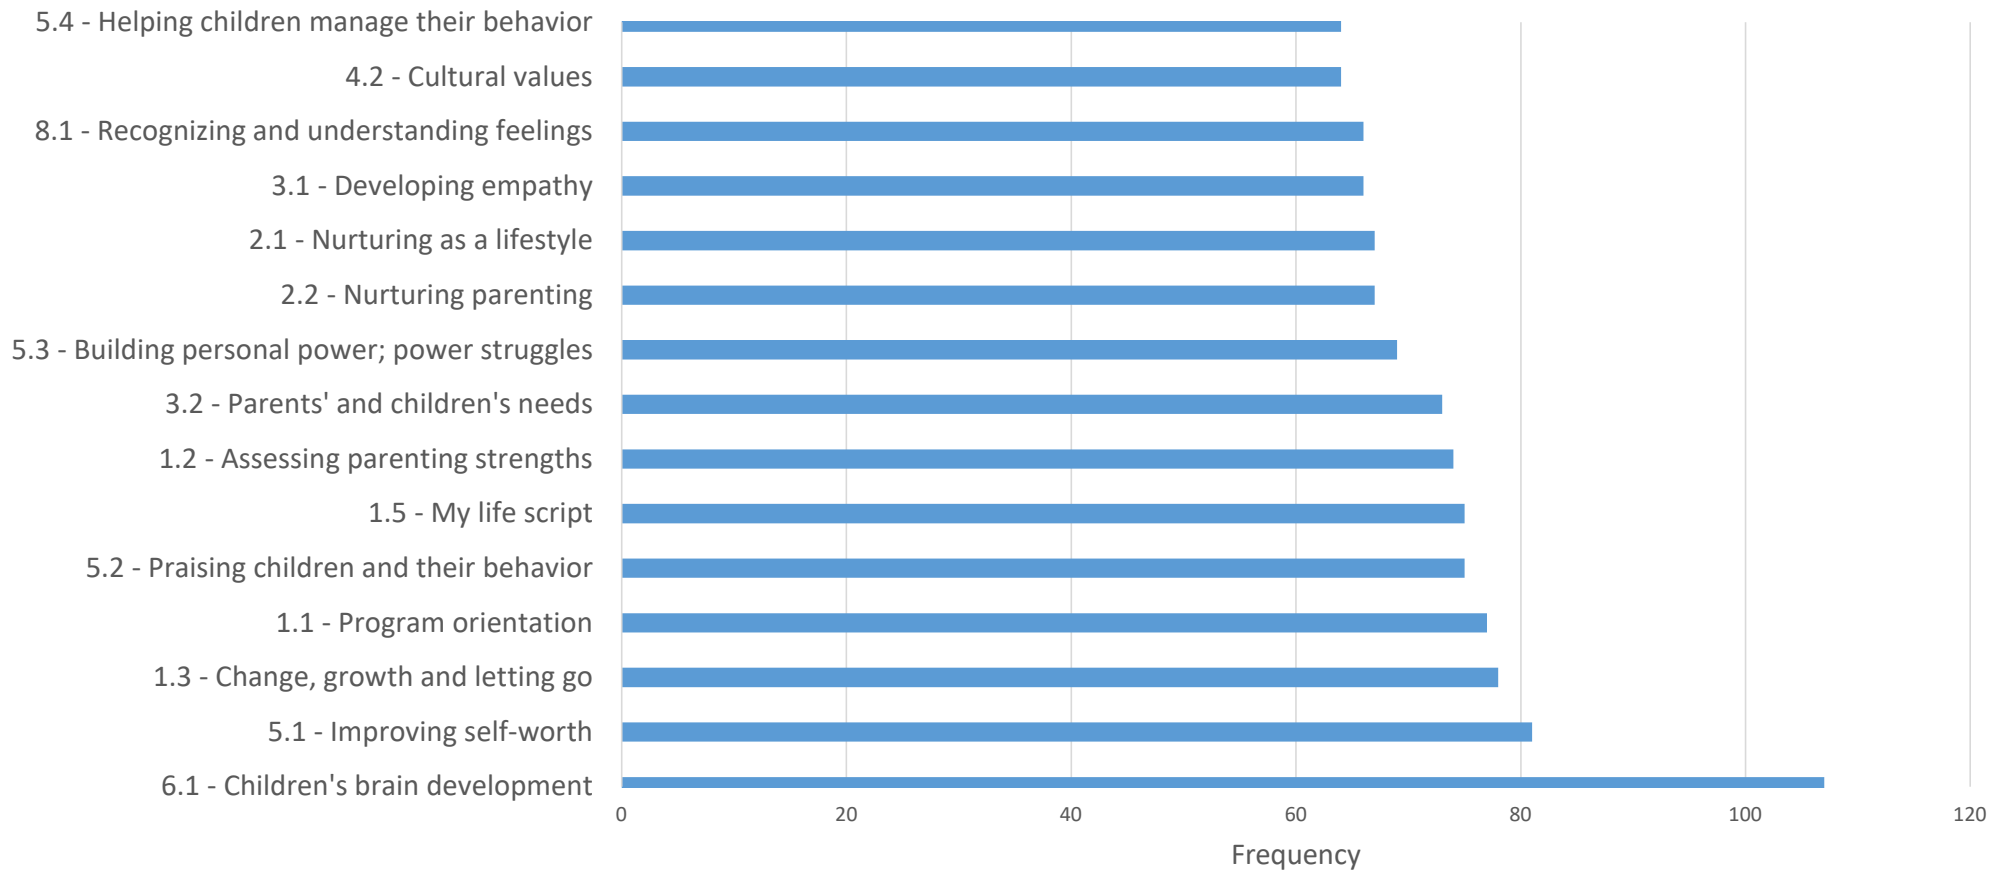

On average, Families Free taught 3.8 lessons per session, and Helen Ross McNabb taught 2.9 lessons per session.

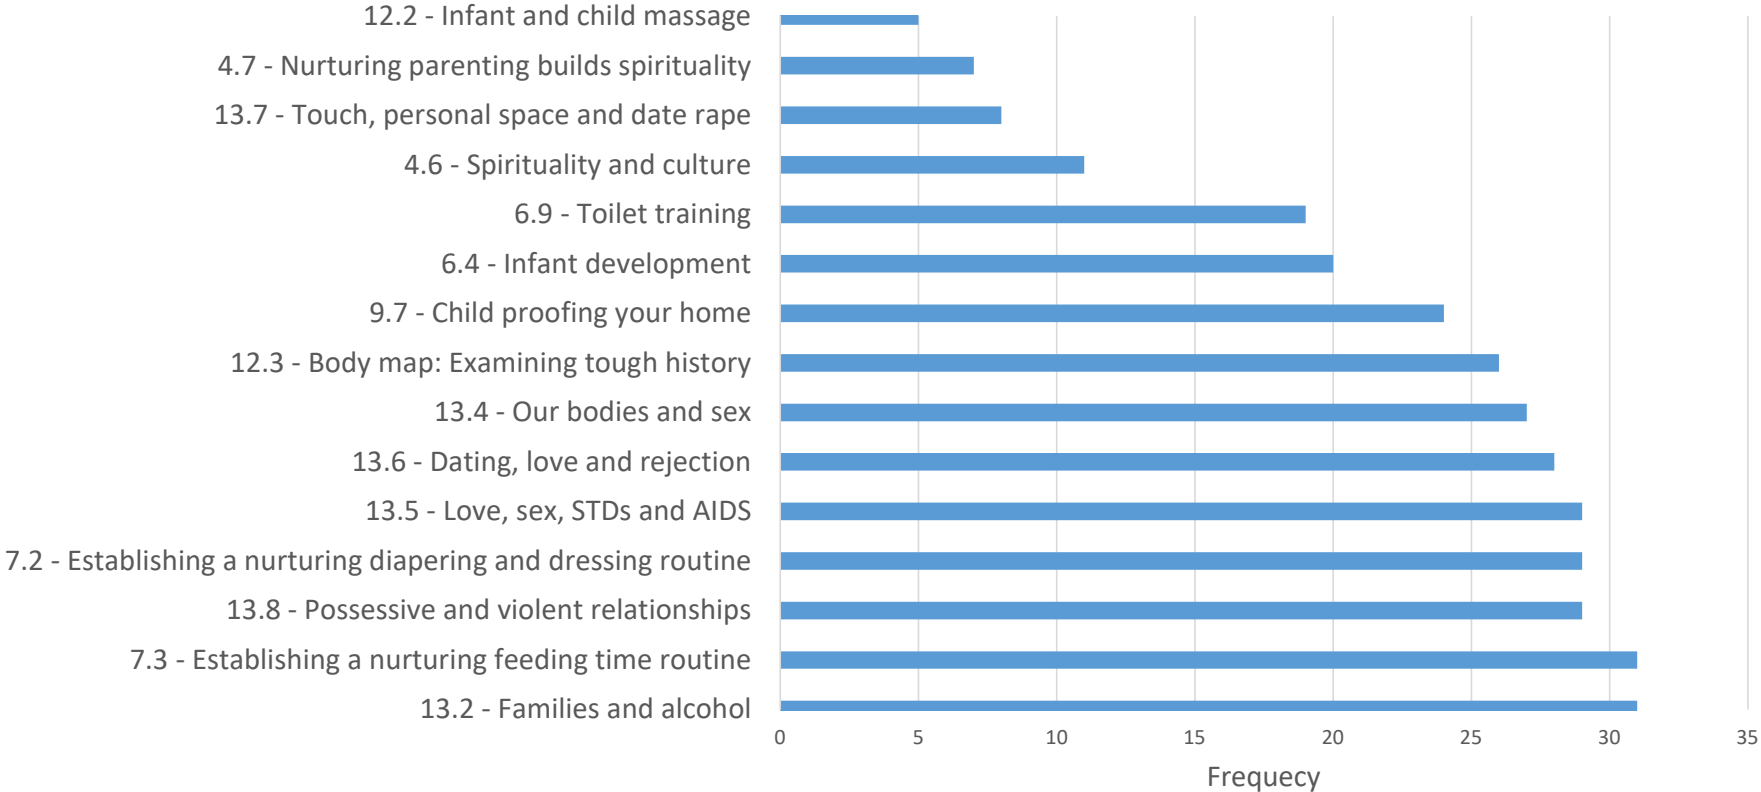

Helen Ross McNabb and Families Free spend approximately the same amount of time teaching a single lesson to a family.

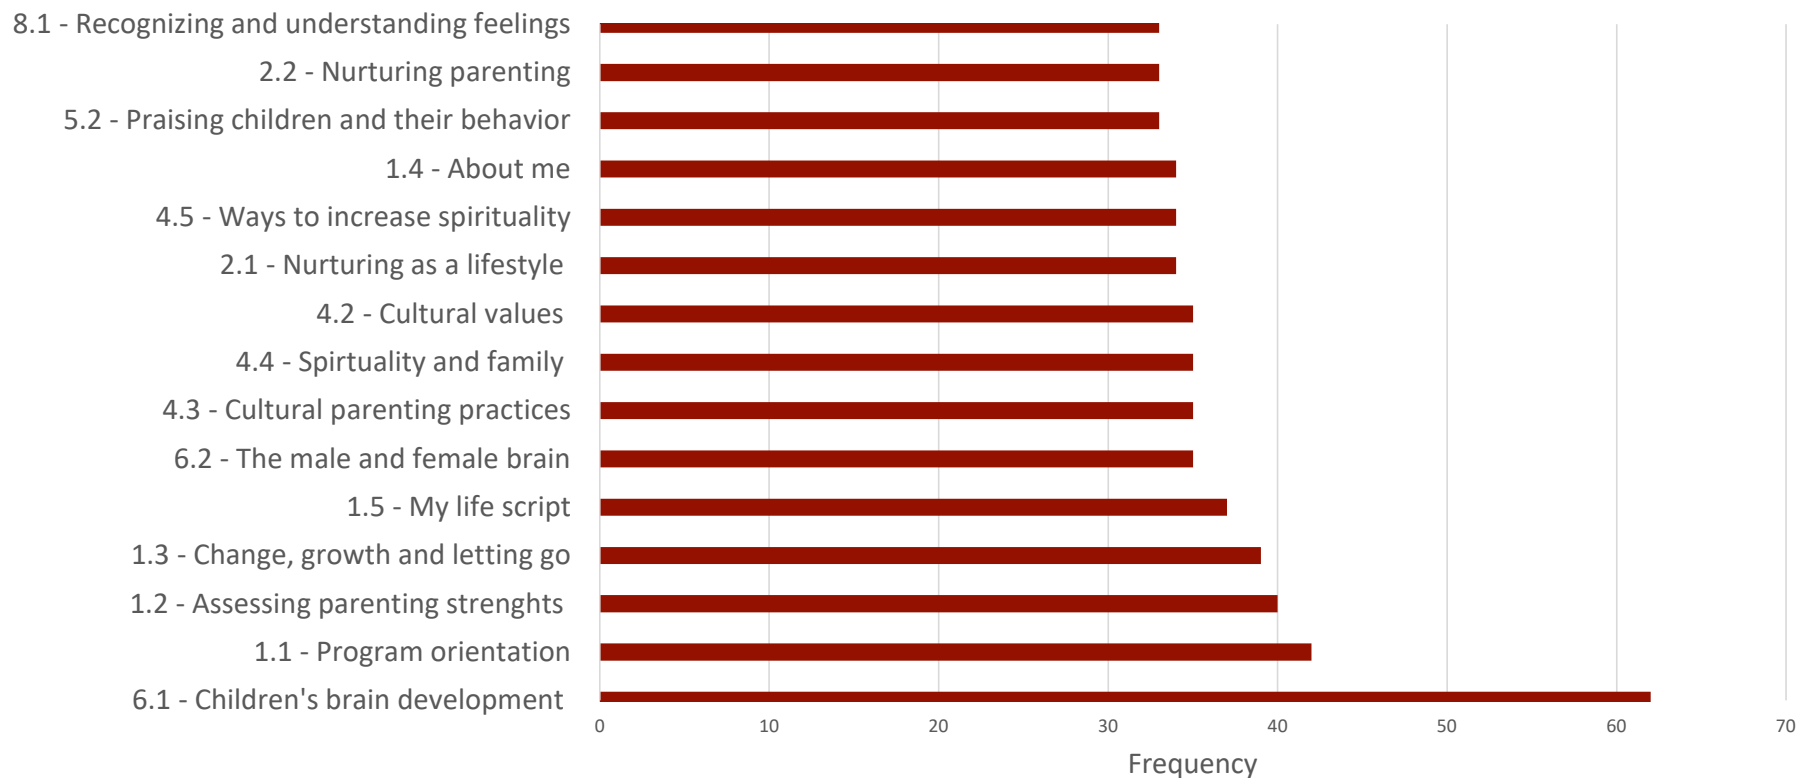

Not all NPP lessons were taught with equal frequency. These are the 15 NPP lessons taught most frequently by Families Free staff:

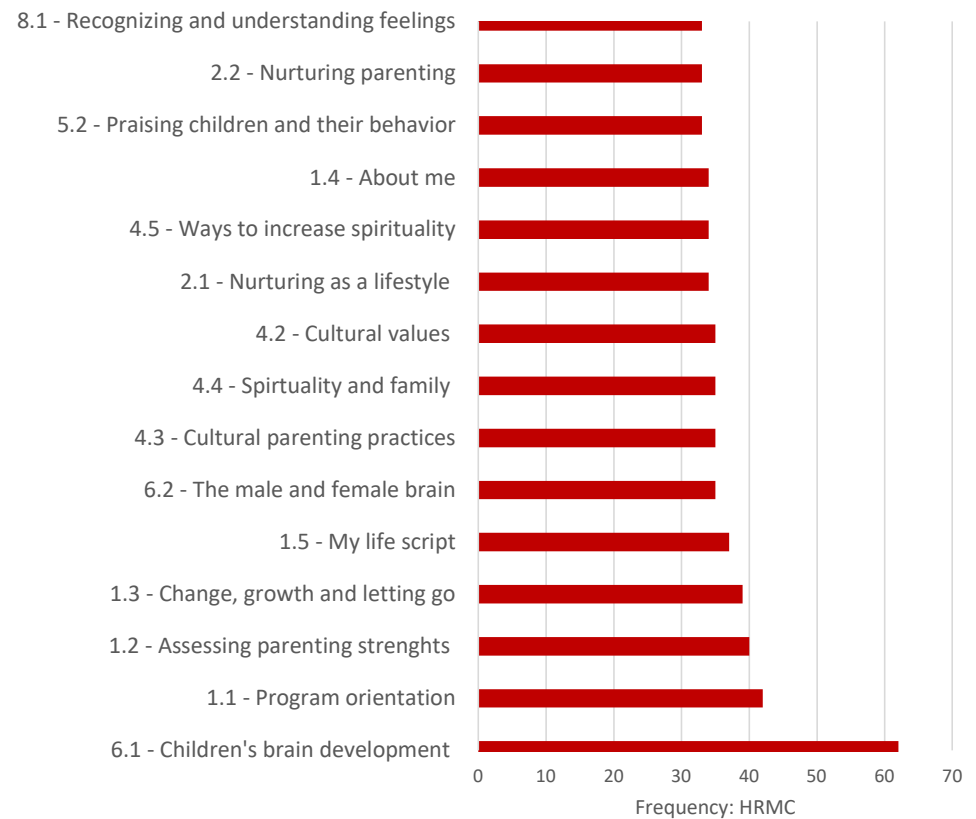

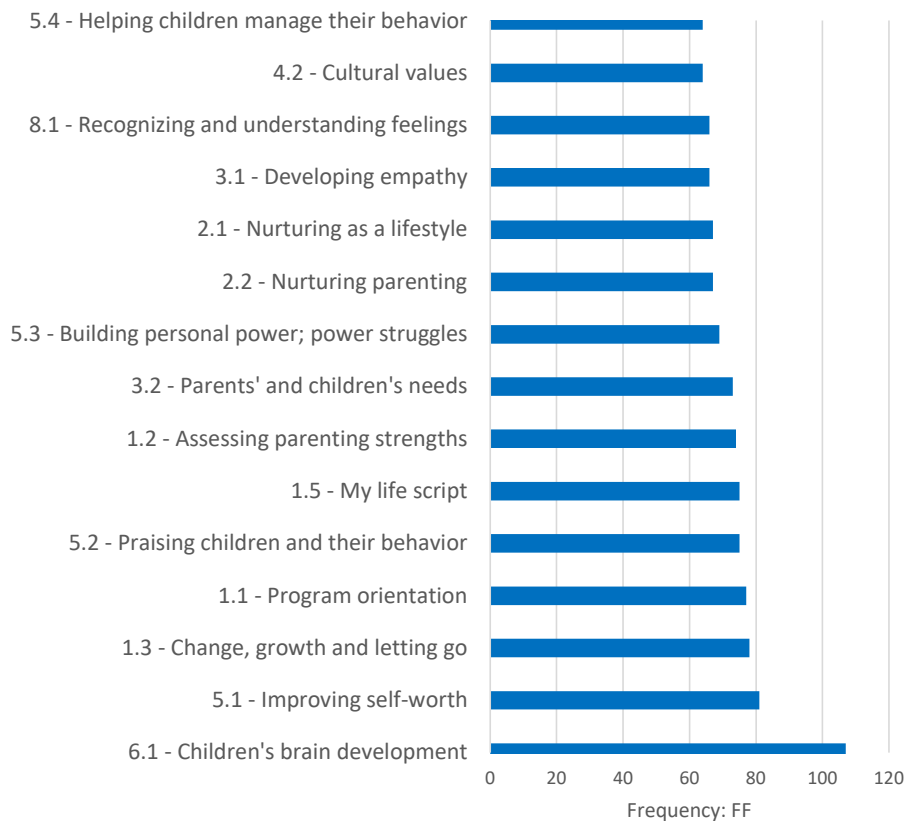

By contrast, these are the NPP lessons taught LEAST frequently by Families Free staff delivering NPP.

We see a similar pattern emerge when we look at the most frequently taught lessons by Helen Ross McNabb Center, displayed here. Note, we do not display the least frequently taught lessons, as each lesson was taught at least 15 times.

We would also point out that the actual lessons that are being taught most frequently varies from one agency to the next.

Families Free gave families a high comprehension rating (6 or 7 on a 7-point scale) approximately 77 percent of the time; for HRMC, the rate is similar: 79 percent of the time HRMC staff rated families' comprehension either a 6 or 7 on the 7-point comprehension scale.
